Lyve Canvas by Breathing Color

Description:

Lyve Canvas is a 19 mil bright white, consistent polycotton blend matte canvas using an acid-free neutral pH coating. Unlike 99.9% of available inkjet canvas products on the market today, this canvas utilizes our "Chromata White" optical brightener additive-free and fluorescent whitening agent-free breakthrough technology. "Chromata White" gives the end-user the most stable platform on which to print photographs and fine art works without the metamerism issues or color shift issues inherent on other canvases. Optical brighteners compromise the attainment of true color, they complicate profiling accuracy, and they inevitably deteriorate and yellow over time.

Specifications:

Type of Material.....	65% Polyester, 35% Cotton
Basis Weight.....	450gsm
Caliper.....	19 mil
Opacity.....	98%
Texture.....	17 microns
